## NOTES

1. Parts, quantities, materials and finishes as the parts list 210201_P01_WALL-PANEL-ASSY-BACK-LOWER-B1_BOM.csv (its rows under 210201), word for word; each part's own drawing holds its sizes and tolerances.
2. Items marked * (6 108002, 10 838001, 11 838004, 12 838005, 13 848001) are not in the STEP 210201_P01_WALL-PANEL-ASSY-BACK-LOWER-B1_STEP.step P01: they have no balloon; their places are in their rows and the joints register.
3. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
4. Interface sizes (ordinates, true mm from the STEP): the top rail's rivnut centres (J-WALL-01's stopped joints and the 2 spigot rivnuts), from the frame's outer end: 838003 at 100, 220, 473, 725.99, 978.99, 1098.99.
5. Interface sizes (ordinates, true mm from the STEP): the ledge's rivet centres, from the frame's outer end: 838012 at 80.74, 295.71, 510.69, 725.66, 940.64, 1155.61.
6. Fitted at the factory (D-87), as the parts list's rows give it: the rivnuts 838003 set in the frame's Ø10 holes after its welding and touch-up (J-FRAME-01), a stop washer 831002 under each stopped-joint rivnut's head, which sets the 2.26 gap; the 2 spigots 831001 screwed into the top rail's spigot rivnuts with threadlocker (H-05), locating the panel above; the ledge 211801 held on the bottom rail's room face as the drill jig for the rail's Ø3.3 holes, then riveted with 6 closed-end countersunk blind rivets 838012 (D-166, D-170), and its pad 848015 bonded on the leg; the skin 211401 bonded to the frame with the bond set 108002, one 12 x 3 joint on every member it touches, overhanging the frame 1.62 at the closing seam, so the skin seam is 2.26 (R-J16) (D-137, bond spec section 8), laid face down on a flat table with the ACP face as datum; the fill pieces friction-fitted in their bays: bay 1 F09, bays 2 and 3 F10 (bay 3's turned over left to right), bay 4 F11; the captive bolts 838001, a washer 838004 under each head, each held by a retainer 838005 in its Ø19 access hole (J-BASE-01 or J-WALL-01 in the bottom rail, J-WALL-02 at the corner; HOLD-02); the gasket 848001 on the top rail, the nut side of J-WALL-01.
7. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
