NOTES

1. Parts, quantities, materials and finishes as the parts list 210203_P01_WALL-PANEL-ASSY-BACK-UPPER-B3_BOM.csv (its rows under 210203), word for word; each part's own drawing holds its sizes and tolerances.
2. Items marked * (6 108002, 9 838001, 10 838004, 11 838005) are not in the STEP 210203_P01_WALL-PANEL-ASSY-BACK-UPPER-B3_STEP.step P01: they have no balloon; their places are in their rows and the joints register.
3. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
4. Interface sizes (ordinates, true mm from the STEP): the top rail's spigot rivnut centres, from the frame's outer end: 838003 at 100, 1098.99.
5. Fitted at the factory (D-87), as the parts list's rows give it: the rivnuts 838003 set in the frame's Ø10 holes after its welding and touch-up (J-FRAME-01); the 2 spigots 831001 screwed into the top rail's spigot rivnuts with threadlocker (H-05), locating the ceiling above; the skin 211403 bonded to the frame with the bond set 108002, one 12 x 3 joint on every member it touches, overhanging the frame 1.62 at the closing seam, so the skin seam is 2.26 (R-J16) (D-137, bond spec section 8), laid face down on a flat table with the ACP face as datum; the fill pieces friction-fitted in their bays: bay 1 F12, bays 2 and 3 F13 (bay 3's turned over left to right), bay 4 F14; the captive bolts 838001, a washer 838004 under each head, each held by a retainer 838005 in its Ø19 access hole (J-BASE-01 or J-WALL-01 in the bottom rail, J-WALL-02 at the corner, J-CEIL-01 in the top rail; HOLD-02).
6. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
