

DRAWING DATA

Part: 711001 ELECTRICAL - POWER UNIT - ENCLOSURE BODY
Tên (VN): Điện - hộp nguồn - thân hộp
Rev / status: P01 / DRAFT, not for production
UNITS: mm. Scale 1:2 (iso 1:5) on A2. ISO first-angle projection (ISO 5456-2), symbol below.
MATERIAL: aluminium 5052-H32, 1.0 mm sheet (status: proposed).
FINISH: mill finish, hidden inside the pod (D-79). Deburr every edge.
SOURCE: the 711001 P01 STEP and CAD (same revision), 2026-11-01.

GENERAL NOTES

1. GENERAL TOLERANCE: ISO 2768-m. Hole positions ±0.2; hole diameters +0.1/0, the PEM holes H05-H09 +0.08/0.
2. Outside size 296 x 260 x 72 (datums A bottom, B left in the FRONT view, C back face); lips 22 inward.
3. Inside bend radius 1.0 (= thickness), K-factor 0.44, square bend reliefs. Cut from the flat pattern 711001_P01_ELECTRICAL-POWER-UNIT-ENCLOSURE-BODY_DXF.dxf (same revision).
4. Fit the Heyco 2836N bushings in H01-H03 after folding. Press the PEM CLA-M4-1 clinch nuts into H05-H08 and the FHA-M5-12 earth stud into H09, head outside (PEM's installation data; the order with the folding is the factory's, with its tooling).
5. HOLD (not cut yet): the fixing to B2's frame (WALL, IF-12). H09's place is an assumption until the unit's inside layout (the factory's).
6. (236) and (240): the H05-H08 pitch, for reference; the hole table gives the positions.
7. View D: the bottom, seen in the direction of arrow D (from below), drawn turned 180°: datum B is on its right, C at its top.
