

PRINCIPAL VIEW 1:5
X = +X, Y = +Z (pod axes); looking toward +Y

SECTION D-D 2:1
across the bends, at the middle
one end, the other end the same
typical at every side
X = -Y, Y = +Z (pod axes)
looking toward +X

FLAT PATTERN 1:10
from 511201_P01_LINING-TRAY-BACK-LOWER-B1_DXF.dxf, as its x and y draw it: the side it shows faces you
bend lines thin chain, B1 to B8
UP: the flange folds toward you

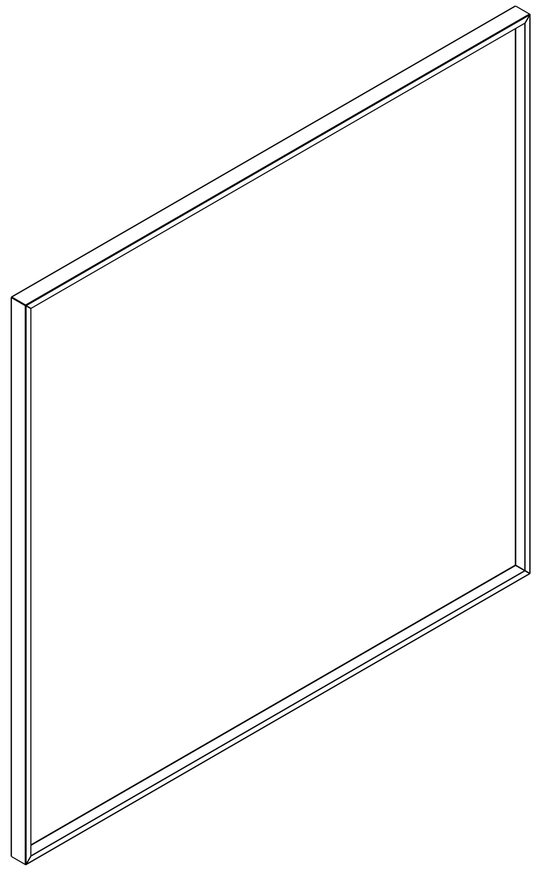

BENDS B1-B8: 511201_P01_LINING-TRAY-BACK-LOWER-B1_DXF.dxf
UP: the flange folds toward the viewer of the flat pattern as drawn; K-factor 0.44, inside radius from the model

GENERAL NOTES

1. UNITS: mm. Do not scale the drawing. ISO first-angle projection (ISO 5456-2), symbol in the title block. Dimensions to ISO 129-1. Sheet 1: views, sections and hole tables; sheet 2: these general notes.
2. Views: the principal view looks toward +Y (X = +X, Y = +Z (pod axes); looking toward +Y); every view's title gives its own X and Y and how they map to the pod axes (conventions section 4). On every view X runs right and Y up.
3. TRAY: galvanized steel sheet 0.5, DX51D+Z (EN 10346). Blank laser cut or punched from its DXF, then folded on a press brake: the four returns 90° toward the room, then the four 12 lips 90° inward; inside radius 1 x t (the model's; the factory's tooling confirms it); corner reliefs as the DXF.
4. The floating inner leaf (D-17): no screw ever joins it to the frame. It hangs on the wall clips, which only hold, and its bottom return sits on the panel's cassette ledge and its pad (the Lead's ruling of 2026-11-01).
5. The felt, a part of its own, is held by the lips over the 24 air gap (D-17).
6. Bent from the flat pattern v2/03-Manufacturing/wall/511201_P01_LINING-TRAY-BACK-LOWER-B1_DXF.dxf (sha256 c21fc061bdd7): its CUT outline, its BEND lines the bend centre lines, its MARK lines the bend zones' edges. Inside radius R0.5 from the model; K-factor 0.44 (calculation: the DXF's bend lines and flat size against the model's flanges at that radius, every bend within 0.05). Flange lengths are outside sizes, to each fold's outside sharp; the bend table gives each bend's direction, angle and allowance.
7. TOLERANCES (PROPOSED until the shop confirms; not ISO 2768): blank sizes ±0.5; fold positions ±0.5; folds 90° ±1°; the back flat within 2 over its length (assumption, guideline 6.3)
