PARTS LIST: 610401 AIR - SUPPLY FAN BOX

ITEM	PART NUMBER	NAME	QTY	MATERIAL	FINISH
1	611402	AIR - FAN BOX CASING - SUPPLY	1	Aluminium (alloy HOLD)	mill finish (hidden, D-79)
2	618401	AIR - FAN - NOCTUA NF-A14 INDUSTRIALPPC-3000 PWM	2	Fan envelope 0.3 kg (assumption)	-
3	611501	AIR - INTAKE RISER	1	Galvanised steel DX51D+Z	galvanised
4	618102	AIR - SUPPLY TRANSITION - HOLD	1	HOLD envelope - no mass	-
5	618103	AIR - RISER TRANSITION - HOLD	1	HOLD envelope - no mass	-

NOTES

1. Parts, quantities, materials and finishes as the parts list 610000_P01_AIR-PARTS-LIST_BOM.csv (its rows under 610401), word for word; each part's own drawing holds its sizes and tolerances.
2. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
3. Joined at the factory and shipped as one unit (D-87): the casing 611402 on top of the intake riser 611501, the riser transition 618103 between them, the two fans 618401 in the casing's top, blowing up into the supply transition 618102. The casing is open at its bottom and its top, where the air passes (AIR feature rationale F-6104-01, F-6104-02).
4. On site the unit slides into DR, down to the riser's foot over the mesh space, and the fan box's plug-in connector is mated (assembly guide, step 13). Its fixings in DR are on hold with AIR and FRONT (the same step).
5. HOLD: the fans' fixing in the casing (618401 is HOLD in the parts list), and the two transitions, drawn as their held envelopes until the AIR follow-up designs them (F-6104-03).
6. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
