

NOTES

1. Fixed glass unit: pane 361003 in the Bohle U-profile 368004 (4 pieces, mitred) with the silicone U-seal 368002 on its four held edges; the pane's half 368003 of the 180 deg magnetic seal on its free edge, from Z 105 with the door's half (HOLD: a quote question).
2. The channels sit hidden: in the base band (bottom, BASE), inside DR behind a slot in its skin (right edge and diagonal) and inside DT behind a slot in its underside (top). Their fixings come with those designs.
3. The pane carries no closing load on its free edge: the door is held by its hinges and the catch in DT, and the magnetic seal pulls in the glass plane (PM ruling). Edge movement under 16 N spread along it: 2 mm or less.
4. Mass 29.54 kg (calculation; parts list).
5. UNITS: mm. Angles in degrees. Mass in kg.
6. Projection: first angle (ISO 5456-2). The front view looks toward +Y, at the door from outside the pod; the view from above is below it; the view from the left is to its right; the iso view is for reading only. 2D axes: front X(2D)=X, Y(2D)=Z; above X(2D)=X, Y(2D)=Y; left X(2D)=-Y, Y(2D)=Z (guideline 3.3). Coordinates are the pod's (conventions 4).
7. No ISO 2768 class on glass, seals or sandwich parts (conventions 3). Tolerances given here are PROPOSED from function until the maker confirms what it holds.
8. Status DRAFT P01: for the prototype and the factory's door sample only, not released (conventions 8).
9. Why each feature is where it is: v2/02-Drawings/front/FEATURE-RATIONALE.md. Parts list: v2/03-Manufacturing/front/*_BOM.csv.

TITLE DATA	
PART NO.	360002
NAME	FRONT - FIXED GLASS UNIT
TÊN	Cụm vách kính cố định
REV / STATUS	P01 / DRAFT
MATERIAL	see the parts list
FINISH	see the parts list
SCALE	1:10
UNITS	mm
PROJECTION	first angle
SHEET	A2
DOC TYPE	ASSEMBLY DRAWING
