

FRONT VIEW 1:2

X = +X, Y = +Z (pod axes); looking toward +Y

VIEW FROM ABOVE 1:2

X = +X, Y = +Y (pod axes); looking down (toward -Z)

SECTION A-A 2:1

X = -Y, Y = +Z (pod axes); looking toward +X

PARTS LIST: 111301 BASE - SILL - FIXED GLASS

ITEM	PART NUMBER	NAME	QTY	MATERIAL	FINISH
1	111302	BASE - SILL - FIXED GLASS - BENT PROFILE	1	aluminium sheet EN AW-5005 H14, 2 mm (assumption)	black anodised, matte, 20 um (class AA20, EN ISO 7599)
2	111303	BASE - SILL - FIXED GLASS - DOOR-END PLATE	1	aluminium sheet EN AW-5005 H14, 2 mm (assumption)	black anodised, matte, 20 um (class AA20, EN ISO 7599)

NOTES

1. Parts, quantities, materials and finishes as the parts list 110000_P01_BASE_BOM.csv (its rows under 111301), word for word; each part's own drawing holds its sizes and tolerances.
2. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
3. Weld the door-end plate 111303 into the bent profile 111302's door end (X 218.5), its outer face flush with the profile's end, all round where it meets the profile (filler 5356, assumption); the weld closes the C3 reliefs at the profile's inside radii. Grind the plate's outer face flush, then anodise black AA20 as one part (D-150; BASE feature rationale FS-03, FS-05).
4. The 4 M3 flush rivnuts 838008 go into the seat's countersunk holes after anodising, at the band assembly 110106 (BASE parts list).
5. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
