GENERAL NOTES

1. UNITS: mm. Do not scale the drawing. ISO first-angle projection (ISO 5456-2), symbol in the title block. Dimensions to ISO 129-1. Sheet 1: views, sections and hole tables; sheet 2: these general notes.
2. Views: the principal view looks up (toward +Z) (X = (0.889, -0.457, 0.000), Y = (-0.457, -0.889, 0.000) (pod axes); looking up (toward +Z)); every view's title gives its own X and Y and how they map to the pod axes (conventions section 4). On every view X runs right and Y up.
3. Origin O = the part's corner shown; O1, O2... are O seen in each view. Hole positions in the tables are from O.
4. Cut from 6063-T6 aluminium tube to the length and end cuts shown, as the frame's cut list row gives them (D-120); mill finish, hidden (D-79). TIG-welded into its frame in the frame's jig (its weldment drawing).
5. Holes, where the tables show them: drilled after welding by CNC or a drill jig that locates on the frame's joint faces, at the places the frame's weldment drawing gives (as J-FRAME-01 for the welded frames); this sheet shows them on the tube for reference. Rivnuts 838003 are set after that.
6. Holes go THRU the part unless the table says otherwise; deburr both sides.
7. TOLERANCES (PROPOSED until the shop confirms; not ISO 2768): cut length +0/-0.5 and end angles ±0.25° (assumption, as the BASE and WALL cut lists); hole positions to the frame's weldment drawing (R-J6: Ø0.4 to its datums); rivnut holes Ø9.53 +0.10/0 (maker); other hole sizes +0.2/0 (assumption). Not ISO 2768 on the tube.
8.
