

NOTES
1. Tolerances (assumption): cut length +/-1; bent sizes +/-0.5.
2. Galvanised steel DX51D+Z, 0.5 thick, hat section: crown 20, height 24, flanges 2 x 12 (assumptions).
3. Blank and bend lines: 513102_P01_LINING-RIB-CEILING_DXF.dxf.
4. Fixing to the tray and to the felt: HOLD (H09), drawn as touching only.
5. Two per cassette, at X' = +/- cs_w/6 (three equal felt spans).
6. The front view (the hat section) is drawn at 2:1 so the bends read; the other views at 1:5.
7. UNITS: mm. Angles in degrees. Mass in kg.
8. Projection: first angle (ISO 5456-2). Views: front looks toward +Y; the view from above is below it; the view from the left is to its right.
9. 2D axes: front view X(2D)=X, Y(2D)=Z; view from above X(2D)=X, Y(2D)=Y; view from the left X(2D)=-Y, Y(2D)=Z (guideline 3.3).
10. Dimensions run from the datum faces named in these notes (overall sizes where none is named), and to hole centres. No ISO 2768 class is applied (conventions 3); the tolerances in note 1 are assumptions until the factory confirms what it holds.
11. Status DRAFT P01: for the prototype and the factory's sample only, not released.
12. Why each feature is where it is: v2/02-Drawings/ceiling/FEATURE-RATIONALE.md.

TITLE DATA (the title block fields can't be set by script)	
PART NO.	513102
NAME	LINING - RIB - CEILING
TÊN	Gân đỡ tấm tiêu âm trần
REV / STATUS	P01 / DRAFT
MATERIAL	Galvanised steel DX51D+Z
FINISH	galvanised (Z coating, grade to confirm)
SCALE	1:5, front view 2:1
UNITS	mm
PROJECTION	first angle
SHEET	A2

Dept.	Technical reference	Created by 1/11/26	Approved by
		Document type	Document status DRAFT
		Title LINING - RIB - CEILING	DWG No. 513102
			Rev. P01 / Date of issue / Sheet 1/1
