NOTES

1. Parts, quantities, materials and finishes as the parts list 210201_P01_WALL-PANEL-ASSY-BACK-LOWER-B1_BOM.csv (its rows under 510201), word for word; each part's own drawing holds its sizes and tolerances.
2. Items marked * (4 848011, 5 848016, 6 848012) are not in the STEP 510201_P01_LINING-CASSETTE-BACK-LOWER-B1_STEP.step P01: they have no balloon; their places are in their rows and the joints register.
3. Item 3 518003 is shown by the STEP's held envelopes NO-PN-HOLD-H03: the part isn't named yet (DRAFT); its places and count are the envelope's.
4. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
5. Datum A: 511201's +Y face, the tray's back face, toward the panel frame (ISO 5459).
6. Datum B: 511201's -X face, the tray's end return, its outer face (ISO 5459).
7. Datum C: 511201's -Z face, the tray's bottom return, its outer face (ISO 5459).
8. Interface sizes (ordinates, true mm from the STEP): the clip centres across the cassette, from datum B (principal view): 518003 at 367.26, 760.25.
9. Interface sizes (ordinates, true mm from the STEP): the clip centres up the cassette, from datum C (principal view): 518003 at 100, 1018.61.
10. Fitting order (WALL's feature rationale F20, F22, F23 and the parts list): (1) the tray, its 34 mm returns turned in as 12 mm lips; (2) the felt, dropped in behind the lips, 1 mm clear inside the returns: the lips hold it with no glue (settles H09), over the 24 mm air gap (D-17); (3) the joint strip 848016 along the top edge, PSA side down: the upper cassette stands on it across the 2.26 joint; (4) the clips 518003 in their four zones, 100 from the cassette's top and bottom on the panel frame's first and last studs (zones reserved until the clips' hole patterns, HOLD H03, HOLD-08). The cassette is a floating inner leaf (D-17, D-47): it sits on the panel's cassette ledge and its pad, which carry its weight and the upper cassette's, and the clips only hold it (D-170). The edge seal 848012 on its X 0 edge only touches the next back cassette across the 2.26 gap and carries no load (R-J18). Items marked * go as their rows say: the hook-and-loop pads 848011 only line the cassette up and carry no load (D-47).
11. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
