GENERAL NOTES

1. UNITS: mm. Do not scale the drawing. ISO first-angle projection (ISO 5456-2), symbol in the title block. Dimensions to ISO 129-1. Sheet 1: views, sections and hole tables; sheet 2: these general notes.
2. Views: the principal view looks toward +Y (X = +X, Y = +Z (pod axes); looking toward +Y); every view's title gives its own X and Y and how they map to the pod axes (conventions section 4). On every view X runs right and Y up.
3. Datums (ISO 5459): A = top face (the wall seat, Z 110); B = axis of the spigot hole H08 (joints register R-J6, R-J13); C = the outer face (Y 850, flush with the ACP), which stops the turn about B. Origin O = datum B's axis on datum A; O1, O2... are O seen in each view. Hole positions in the tables are theoretically exact from O.
4. Both ends square (BASE tube cut list).
5. Holes go THRU 1 WALL of the member unless the table says otherwise; deburr both sides. Coaxial holes in two walls of one member are shown in section D-D.
6. TOLERANCES (PROPOSED until the shop confirms; not ISO 2768): hole positions Ø0.4 to A|B|C (joints register R-J6); the other spigot rivnut holes ±0.1 from B along the band (joints register 2.11: ST-02, ST-04); rivnut holes Ø9.53 +0.10/0 (maker); other hole sizes +0.2/0 (assumption); cut length +0/-0.5, square ends (BASE cut list, assumption). Not ISO 2768 on the anodised faces.
