PARTS LIST: 610401 AIR - SUPPLY FAN BOX

ITEM	PART NUMBER	NAME	QTY	MATERIAL	FINISH
1	611402	AIR - FAN BOX CASING - SUPPLY	1	Aluminium 5052-H32 sheet (alloy HOLD)	mill finish (hidden, D-79)
2	611404	AIR - FAN BOX BULKHEAD - SUPPLY	1	Aluminium 5052-H32 sheet (alloy HOLD)	mill finish (hidden, D-79)
3	611407	AIR - FAN BOX LINING - SUPPLY END	2	Pyrotek Sorberpoly 2D 32 kg/m3	as supplied (the maker's facing)
4	618401	AIR - FAN - NOCTUA NF-A14 INDUSTRIALPPC-3000 PWM	2	Fan envelope 0.3 kg (assumption)	-
5	611501	AIR - INTAKE RISER	1	Galvanised steel DX51D+Z	galvanised
6	618102	AIR - SUPPLY TRANSITION - HOLD	1	HOLD envelope - no mass	-
7	618103	AIR - RISER TRANSITION - HOLD	1	HOLD envelope - no mass	-
8	611408	AIR - FAN BOX LIP ANGLE - SUPPLY	1	Aluminium 5052-H32 sheet (alloy HOLD)	mill finish (hidden, D-79)
9	618402	AIR - FAN BOX PAD - SUPPLY - RUBBER 40 X 15 X 5 - HOLD	2	HOLD envelope - no mass	-
10	618501	AIR - RISER BUFFER - RUBBER - M6 - HOLD	1	HOLD envelope - no mass	-
11*	838003	HARDWARE - RIVET NUT - M6 - STEEL ZINC - SHEREX CAL2-610-4.2	1	steel 1008/1010	zinc plated, trivalent passivation

NOTES

1. Parts, quantities, materials and finishes as the parts list 610000_P01_AIR-PARTS-LIST_BOM.csv (its rows under 610401), word for word; each part's own drawing holds its sizes and tolerances.
2. Items marked * (11 838003) are not in the STEP 610000_P01_AIR_STEP.step P01: they have no balloon; their places are in their rows and the joints register.
3. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
4. Joined at the factory and shipped as one unit (D-87): the casing 611402 on top of the intake riser 611501, the riser transition 618103 between them. The casing is open at its bottom and its top, where the air passes (AIR feature rationale F-6104-01, F-6104-02). Inside it (section A-A), the two fans 618401 stand on the 2 mm bulkhead 611404, each over its Ø135 bore, and blow up into the supply transition 618102; only the two end walls are lined (611407), from 70 above the fans to the open top, so the air reaches them (D-121).
5. The unit's weight sits on the lip angle 611408, riveted to the casing's front wall, through two rubber pads 618402 on DR's shelf tube F08; the riser buffer 618501, in a rivet nut 838003 on the riser's front face, touches DR's cross tube F07 and holds the unit upright (F-6104-05 to F-6104-07).
6. On site the unit slides into DR, down to the riser's foot over the mesh space, and the fan box's plug-in connector is mated (assembly guide, step 13). Its fixings in DR are on hold with AIR and FRONT (the same step).
7. HOLD: the fans' screws through the bulkhead, with the fans' mounting (618401 is HOLD in the parts list); the lip's 3 rivets, with the casing's; the pads and the buffer (products HOLD); and the two transitions, drawn as their held envelopes until they are designed (F-6104-03, F-6104-04).
8. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.

PROJECT: **Spaceship (FocusPod v2)**	STATUS: **DRAFT**	DATE: 2026-11-01	SHEET: **1/1**
TITLE: **AIR - SUPPLY FAN BOX** Hộp quạt cấp (cụm)
