

FRONT VIEW 1:20

X = +X, Y = +Z (pod axes); looking toward +Y

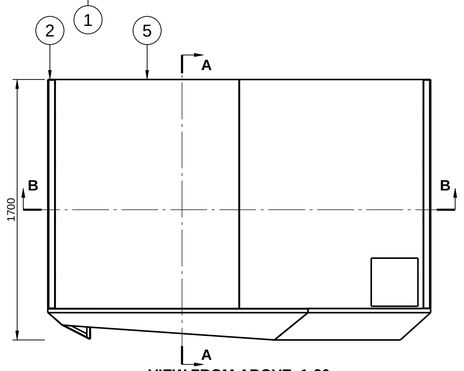

VIEW FROM THE LEFT 1:20

X = -Y, Y = +Z (pod axes); looking toward +X

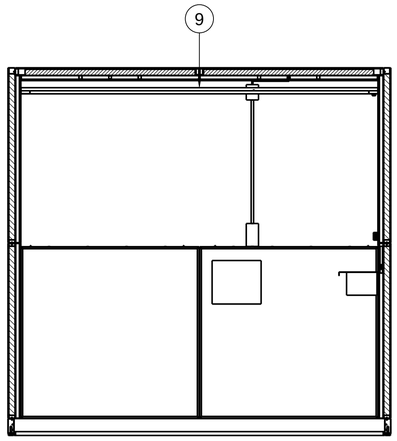

SECTION A-A 1:20

X = -Y, Y = +Z (pod axes); looking toward +X

VIEW FROM ABOVE 1:20

X = +X, Y = +Y (pod axes); looking down (toward -Z)

SECTION B-B 1:20

X = +X, Y = +Z (pod axes); looking toward +Y

PARTS LIST: 100000 POD - SPACESHIP

ITEM	PART NUMBER	NAME	QTY	MATERIAL	FINISH
1	110000	BASE	1	-	-
2	210000	WALL	1	-	-
3	350000	FRONT - DECOR	1	-	-
4	360000	FRONT - DOOR AND GLAZING	1	-	-
5	410000	CEILING	1	-	-
6	510000	LINING	1	-	-
7	610000	AIR	1	-	-
8	710000	ELECTRICAL	1	-	-
9	810000	INTERIOR	1	-	-

NOTES

1. Parts, quantities, materials and finishes as the parts list 100000_P01_POD-MASTER_BOM.csv (its rows under 100000), word for word; each part's own drawing holds its sizes and tolerances.
2. Views in first angle (ISO 5456-2); each view title gives its X and Y in pod axes (guideline 3.3). Visible outlines only, as an assembly drawing shows them.
3. Interface sizes (ordinates, true mm from the STEP): FRONT VIEW: heights from the room floor (Z 0, under the glides): the roof skin's top 2400 (D-21) and the overall top 2402, AIR's roof grille 611602 (PM ruling 2026-11-01: the room's ceiling must clear the overall height).
4. Pod axes (conventions section 4): origin on the room floor at the pod's centre; +X right seen from outside facing the door, +Y back, +Z up; the front is the door side.
5. No floor and no threshold (D-132): people stand on the room floor, and the base stands on its glides (glide_h 10, skeleton P04).
6. Walls and ceiling are 84 deep: ACP 3, bond 3 (D-137), steel frame 40 (D-131), gap 4, lining cassette 34 (skeleton P04, stack_t). Seams 2.26 at a metal stop; the closing seams B1-B2, B3-B4 and C1-C2 have a 5.5 frame gap (joints register 2.8).
7. Still to come (WALL): the back upper panels B3 and B4 and their cassettes 510203 and 510204 are not modelled yet, so the back wall's upper half is empty in the views and sections; this sheet is drawn again when they are (PM ruling 2026-11-01).
8. Sections A-A and B-B cut the teams' parts as modelled; each assembly's own sheets give its build-ups, fixings and sizes.
9. TOLERANCE: the overall sizes are for reference; each part's drawing holds its own tolerances. Not ISO 2768.
